

HIS HEALTH

Grow strong together.

“
**WHEN NEW INFECTIONS
AMONG YOUNG BLACK
GAY MEN INCREASE BY
NEARLY 50% IN 3 YEARS,
WE NEED TO DO MORE TO
SHOW THEM THAT THEIR
LIVES MATTER**
”

PRESIDENT BARACK OBAMA

WE ARE

HIS HEALTH is a united community of advocates and healthcare providers passionately committed to raising the standard of care for Black gay men.

WE BELIEVE

We believe that shifting the HIV epidemic among Black gay men is a shared responsibility for patients, providers, and administrators operating at every level of our nation's health care systems.

We recognize how stigma, discrimination and medical mistrust act as tremendous barriers to good health for many Black gay men.

And we want to do something about it.

To restore trust, we must break down silos and foster better communication between Black gay men and care practitioners.

TO GROW STRONG, WE MUST WORK TOGETHER.

WE ENVISION

Our vision is a world where HIV-related health disparities among Black gay men are meaningfully and vigorously addressed to no end.

THIS IS HOW WE'LL DO IT

SEE

His Health features programs that have demonstrated success in screening, engaging and retaining Black gay men at risk for or living with HIV into quality healthcare.

The key to their success? Program implementation that is informed directly by Black gay/bisexual men. We'll give you a birds eye of view of select programs in action.

LEARN

Working closely with field experts, we've developed a cohort of nationally accredited continuing medical education (CME) courses focusing on the health needs of Black same gender loving men, including PrEP access and sexual health service delivery.

His Health CME faculty are not just content experts. They are also passionate advocates for offering patient - centered care with cultural humility that recognizes the fullness and resiliency of Black gay men.

We'd also like to share the best part - each course is 100% free and accessible to the general public at HisHealth.org.

DO

Have you ever wondered how to start a youth advisory board at your organization? Or maybe you want to know how leveraging local policies can remove systemic barriers to care for young Black gay men. Featured His Health partners will host online trainings to show you how to do these and more.

Training facilitators include staff from the following organizations:

Connecting Resources for Urban Sexual Health (Oakland, CA)

Brothers United + Damien Center (Indianapolis, IA)

Project Silk (Pittsburgh, PA)

Connect to Protect (Memphis, TN)

MEET OUR PARTNERS

His Health is proud to partner with the following organizations to accredit and disseminate our training offerings:
