

Ryan White Services Report (RSR) Data Completeness Rates, 2010-2014

Chart 1: Improvements in Completeness Rates for Demographic Data Elements

Providers are reporting more complete responses for key demographic data elements. This chart shows a continual increase in completeness rates from 2010 to 2014 for enrollment status, housing status, and medical insurance. Poverty level showed a slight decrease in 2014.

Completeness Rates for Client Demographics

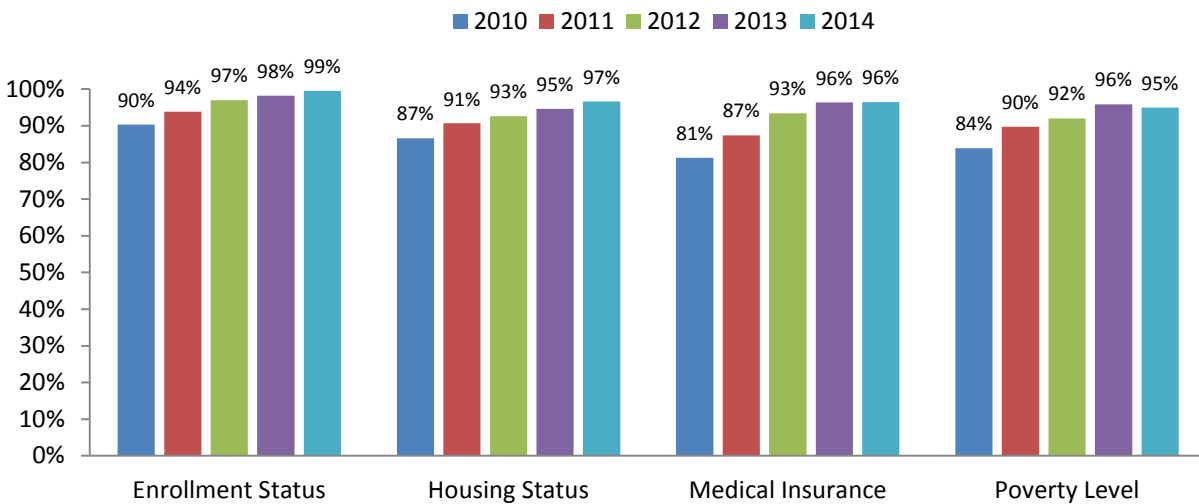

Chart 2: Improvements in Completeness Rates for Clinical Data Elements

This chart shows that although grantees have struggled with reporting Viral Load Test Results, CD4 Test Results, and Prescribed ART, completeness rates from 2010 to 2014 have improved over time. Prescribed ART showed a decrease in 2014.
