About the Integrated HIV/AIDS Planning TA Center

SUPPORTS

Ryan White HIV/AIDS
Program Parts A & B
recipients and
planning bodies

CONDUCTS

national and targeted
training and technical
assistance activities

FOCUSES

on integrated planning
including implementation
and monitoring of
Integrated HIV
Prevention and
Care Plans

Learning Objectives

- Summarize the content and purpose of the new online course
- Describe who will benefit from taking the online course
- Know how to access the online course on the IHAP TAC website

Now released!

- June 30th release of the *Integrated HIV Prevention and Care Plan Guidance, including the Statewide Coordinated Statement of Need, CY 2022-2026*
- Second 5 year planning guidance developed by CDC and HRSA.

Integrated HIV Prevention and Care Plan Guidance, including the Statewide Coordinated Statement of Need, CY 2022- 2026

Division of HIV/AIDS Prevention

National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention
Centers for Disease Control and Prevention

HIV/AIDS Bureau

Health Resources and Services Administration

June 2021

Integrated Plan Guidance is designed to:

- Coordinate HIV prevention and care activities by assessing resources and service delivery gaps and needs across HIV prevention and care systems to ensure the allocation of resources based on data
- Address requirements for planning, community engagement and coordination established by the RWHAP legislation as well as programmatic planning and community engagement requirements established by both HRSA and CDC through guidance
- Improve health outcomes along the HIV care continuum by using data to prioritize those populations where systems of care are not adequately addressing high HIV morbidity and/or lower than average viral suppression rates

Integrated Plan Guidance is designed to...

- Promote a status neutral approach where testing serves as an entry point to services regardless of a positive or negative result, to improve HIV prevention and care outcomes.
- Reduce recipient burden by allowing recipients to submit portions of other significant planning documents (e.g., EHE Plans, Fast Track Cities, Getting to Zero, or Cluster and Outbreak Detection and Response plans) to meet Integrated Plan requirements and by aligning submission requirements and dates across HIV prevention and care funding;
- Advance health equity and racial justice by ensuring that government programs promote equitable delivery of services and engage people with lived experience in service delivery system design and implementation.

HRSA/CDC Expectations

- Continue to use existing Integrated Plans and other jurisdictional plans (EHE Plans, Fast Track Cities) as jurisdictional roadmap until new plans due in December 2022
- For EHE funded jurisdictions, HRSA/CDC encourage jurisdictions to use appendices and checklists used on new guidance for instructions on how to leverage existing EHE documents to satisfy Integrated Plan submission requirements

Got questions?

- We are compiling a FAQ document on the updated guidance. If you have questions on the updated guidance, please [submit](#) them to us.

We are here to help!

- The IHAP TAC is available to provide training and technical assistance on integrated planning and the development of the Integrated HIV Prevention and Care Plans.
- We will be launching some new technical assistance opportunities and training materials soon to help you develop your Integrated Plan.

Stay tuned!

Why Integrate HIV Prevention and Care Planning?

Why is integrated planning important?

- Fosters new approaches to address barriers to HIV prevention, care, and treatment
- Serves as a jurisdictional roadmap
- Leverages existing resources and improves efficiency and coordination of HIV prevention and care service delivery
- Promotes collaboration and coordination in the use of data for prevention and care program planning, resource allocation, evaluation, and continuous quality improvement efforts
- Establishes ongoing mechanisms for stakeholder engagement

What Do We Mean by Integration?

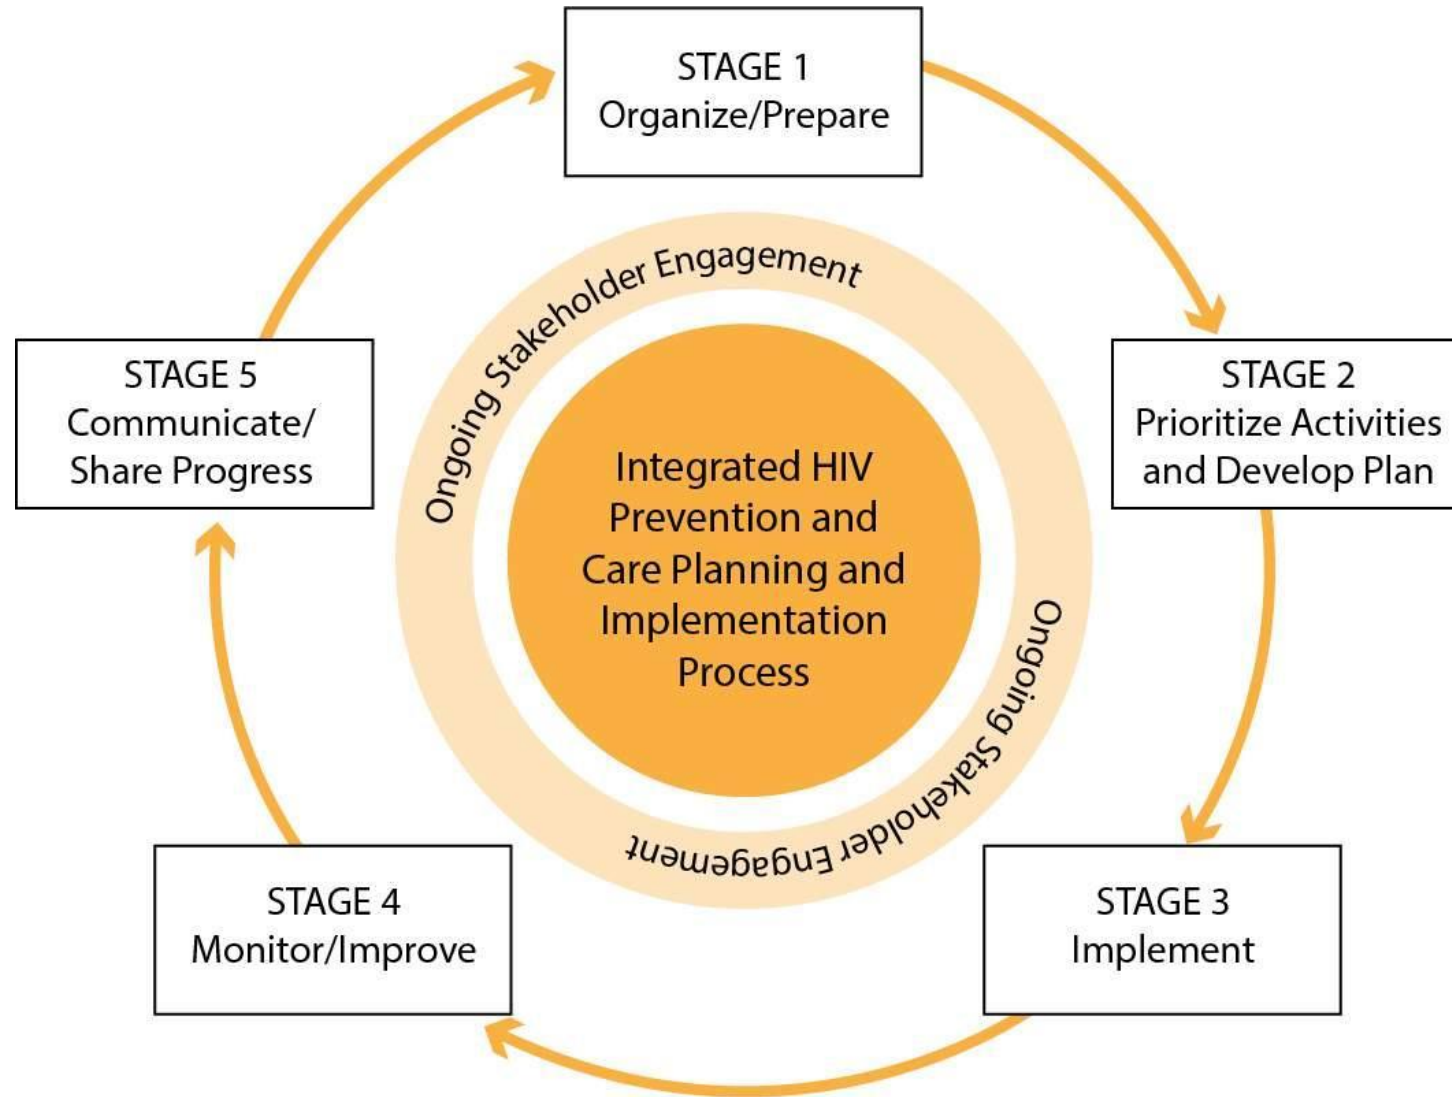

What do we mean by integration...?

- Integration may occur in multiple domains
 - **Planning groups**
 - **Specific planning activities** - needs assessment, plan development, resource allocation, etc.
 - **Physical integration** of recipient services - co-location of prevention and treatment administration
 - **Recipient staff** - staff roles and responsibilities are integrated across prevention and care
 - **Procurement** of HIV prevention and care services

Stages of Integrated Planning

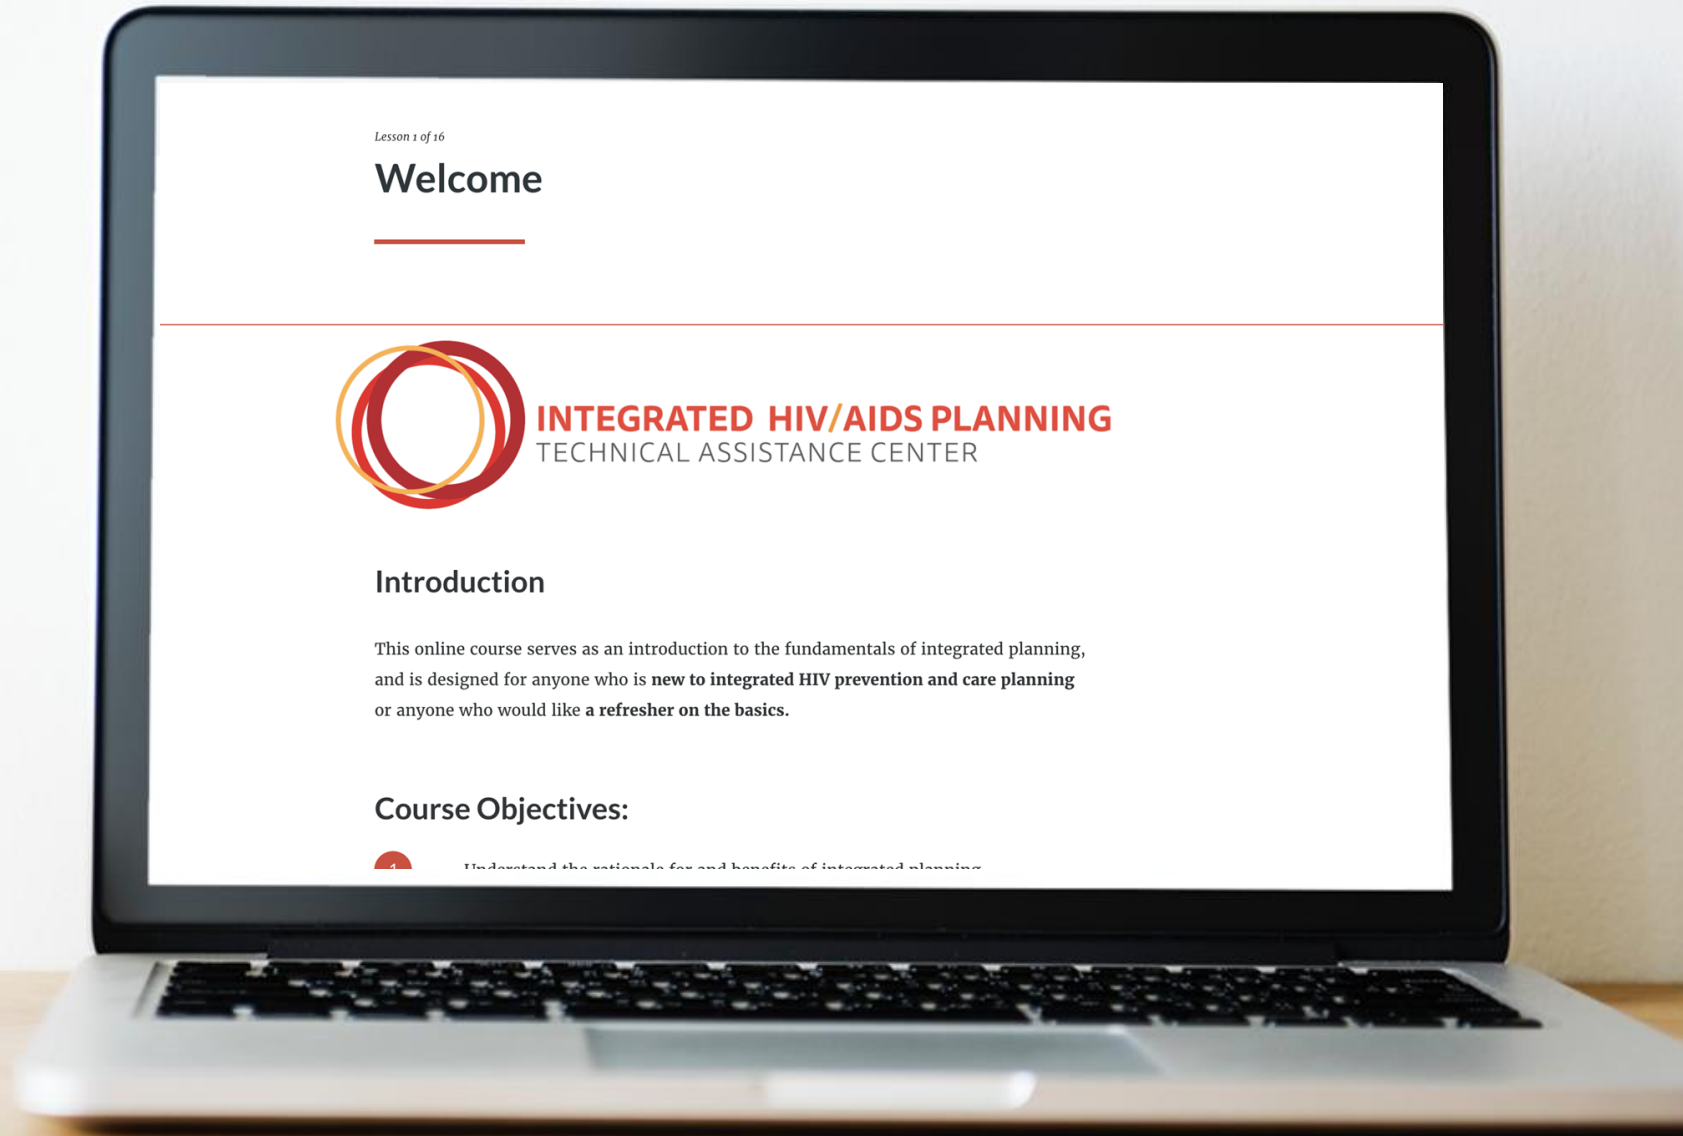

Stages of Integrated Planning:

Interested in
learning
more...?

Take our new
online course!

Who is the course for?

- Designed for:
 - Those new to integrated HIV prevention and care planning
 - Those who would like a refresher on the basics

How does the course work?

- Self-paced
 - Provides real-time updates on progress
- Follows the 5 stages of integrated planning
 - Users can cycle through the stages at their leisure
- Created using Articulate Rise software
 - No user account required
 - Recommend that the course be completed in one sitting
- Complete course evaluation

What are the benefits of the online course?

- Offers strategies, tools, and resources identified from RWHAP Part A and Part B recipients
- Helps to develop and refine your integrated planning skills
- Assists with developing your 2022-2026 Integrated HIV Prevention and Care Plan

How can I access the online course?
